

#All you need is a Airtel Broadband connection.

Airtel no : User name

Account no: password

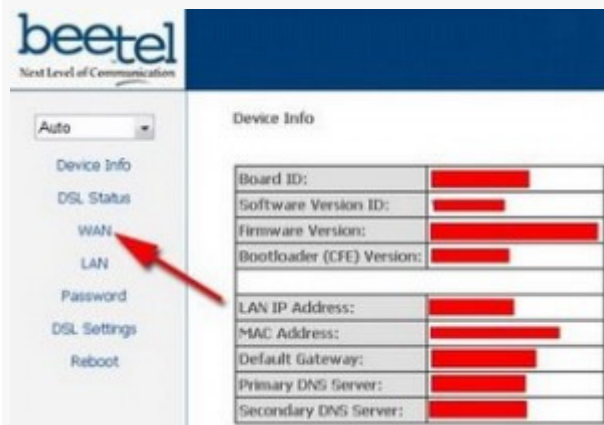

Now all you have to do is

#Go to your modem/router

By typing

192.168.1.1

Default user and pass= admin & password# Now there in **the left bar click** on WAN and then click on edit

Click on next until you get the following screen

Now in the **username** and password field enter the following:

PPP Username:

PPP Password:

PPPoE Service Name:

Authentication Method:

Dial on demand (with idle timeout timer)

Inactivity Timeout (minutes) [1-4320]:

PPP Username : **123xxxxxxx_dsl@airtelbroadband.in**

(Enter your username and password)

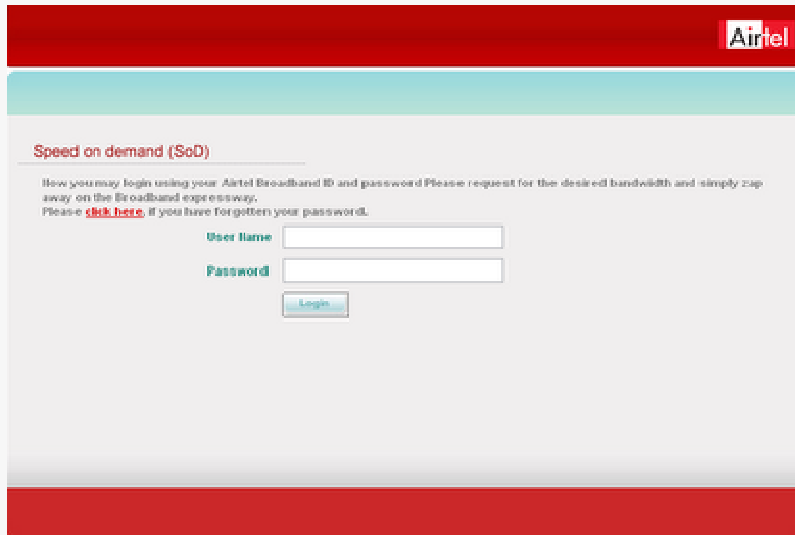

Now in the password field type the account no. or new password if you have changed.

Then save the settings and reboot.

Now how to get 2 MBPS speed??

I'm sure many of you are aware of speed on demand from Airtel.

Go to this page: [CLICK HERE](#)

Airtel

Speed on demand (SoD)

How you may login using your Airtel Broadband ID and password Please request for the desired bandwidth and simply zap away on the Broadband expressway. Please [click here](#), if you have forgotten your password.

User Name:

Password:

And now enter your and password that you have entered in the router.

and click on 2MBPS and activate it.

Bingo! now you are using 2 MBPS Airtel connection!! 😊

Do remember you will be charged as 120/hr.

Updated news is Tata launched the 100 MBPS internet connection in mumbai @ 10,500/month.
